An important part of our Prospectus/Business Plan is our Pro Forma projections of Income and Expense for the first three years of operation. We plan to operate our company consistently with accounting procedures acceptable for audit standards that will enable us to register our securities as soon as possible. Registration should be about three years from the time we become a viable operating company.

The "Return on Capital" shows our estimate of the future value of an investment in three years based upon a capitalization of net after tax income using a conservative capitalization rate.

After you have reviewed the Prospectus/Business Plan and desire to invest, you may do so by completing our "Investor Order Form".

**The Undersigned requests a Prospectus/Business Plan as an "Accredited Investor".**
